Art Unit: 3729

The benefit of claims filed on 28 February 2003 was not entered because the required reference was not timely filed within the time period set forth in 37 CFR 1.78(a)(2) or (a)(5). If the application is an application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a nonprovisional application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the reference to the prior application must be made during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). If applicants desire priority under 35 U.S.C. 102 (e) based upon a previously filed application, applicant must file a petition for an unintentionally delayed benefit claim under 37 CFR 1.78(a)(3) or (a)(6). The petition must be accompanied by: (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted); (2) a surcharge under 37 CFR 1.17(t); and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

Art Unit: 3729

Assuming arguendo that the claims were filed properly they are nevertheless rejected as seen hereinbelow.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 42, 43, 48-50 and 54-68 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 96/37332 (of record) (hereinafter '332) The '332 teaches method of making tip structures or spring contact elements on a sacrificial substrate, mounting tip structures on the contact ends of the interconnection elements and removing the sacrificial substrate wherein the interconnection elements are resident on the sacrificial substrate, wherein the tip structures or contact elements are formed by means of a masking layer on the sacrificial substrate, wherein an electronic component can be a semiconductor, wherein the electronic component can be a space transformer of a probe card assemble (Cf. bottom line of pages 50 and 54 in WO 96/37332).

In the event that the above rejection is not viable, the application still has claims which are properly rejectable over another application. That is there is a provisional rejection under U.S.C. 101 over Application Number 09/846,490

This is **not a Final Rejection**.
